Schunk Partner – your advantages in trading

As a partner of Schunk, you benefit from our complete customer service and many advantages in relation to the product.

- With our certifications, we guarantee long term top quality for your products and applications.
- Make use of our high standard of professional competence, our central production facilities and our specialist engineers who as your partner can effectively support you with their special know-how.
- Product safety is top priority for us. Comprehensive tests and long-term trials in our labs and on our test-rigs mean maximum safety for you.
- You can rely on Schunk! Experience our above-average customer service and product safety through our comprehensive and rapid on-site service.
- You can always contact Schunk. With our modern, worldwide communication network everywhere, you can always get in touch with us on site.
- Your competitiveness is of vital interest to Schunk. With our optimal cost/performance ratio, you are sure to get a fair price for every product.

For all projects in the service area concerning test-rigs and test installations, contacting Schunk Bahn- und Industrietechnik GmbH is always worthwhile.

Test us. You will be surprised at how many advantages are to be had in connection with the product. The Schunk contact address is on the back of this brochure.

Top counseling by our Business Support Centre

At our Business Support Center, we will be happy to advise you on: co-ordination of the optimal production process, selection of material components, environmental influences, application and ambient conditions.

We can implement innovative and customized solutions for product concepts directly and promptly in our own model fabrication shop in conjunction with our toolmaking and jig department.

Through our on-site service facility – with short response times – we support you with our comprehensive know-how as a competent partner. Try us. We look forward to hearing from you!
